

## Tube Bending

### PHI Tube Bending Equipment

PHI offers a complete line of tube/pipe bending machines and tooling designed for applications requiring precision bending and/or small centerline radii. PHI machines are available as manual, semi-automatic or with programmable digital controls for multiple-axis bending.

Capabilities of PHI's Tube Bending Equipment PHI's line of tube bending equipment offers maximum performance for a variety of applications. Capacities range from 1/8" diameter light-wall tubes to 3" diameter IPS heavy pipes.

When precision tube/pipe bending is required, PHI precision tube/pipe bending machines are the answer!
