

Tube End Finishing

PHI Tube End-Finishing Machines and Tooling

PHI tube end-finishing machines are the result of more than 40 years experience in producing tube-fabricating equipment. PHI produced tube end-finishing equipment as Leonard Precision until 1969 and as Conrac's Machine Tool Division until 1985.

PHI Has Machines for Every End-Finishing Job There is a standard machine in the PHI catalog for almost any tube or pipe end-finishing requirement -- flaring, double flaring, beading, squaring, deburring or flanging. Our machines can handle end-finishing tasks for applications ranging from 1/8" light-wall tubing to heavy 8" pipe.
