

Tooling

PHI Tooling -- End Finishing Machines and Benders

PHI tooling complements PHI tube end-finishing machines and PHI tube bending machines. All PHI tooling is manufactured in the same plant as our machines. The same dedicated craftsmen who construct our machines apply the same high quality standards to our tooling solutions. PHI Tooling -- Quality Is Assured When you buy PHI tooling with your machine, you are assured of single source responsibility. You'll also benefit from the backing of PHI's engineering and quality control personnel. These dedicated team members ensure that your finished product meets your specific application requirements.
